## Import & Export and Air Freight Trends – Korea

□ A comparative analysis of weekly air cargo market demand trends from late October until recent times concluded that the three-week trend by November 17 was at least part of the trade route, but it was the peak season for the air cargo market in 2019. As originally anticipated, the peak season for the air cargo market in 2019 affected the market like a passing wind but soon quietly disappeared. Perhaps if you're writing an air cargo history, it's clear that the term 2019 peak season will not be recorded.[Cargopress]

□ Top 10 CASS air cargo export weight by country and the top 10 countries for air cargo exports in the order of China, the United States, Vietnam, Hong Kong, Japan and Germany recorded 49,672 tons, accounting for 74.3% of

the total. There was a change in ranking compared to the same month last year. Total weight decreased -5.4%.

CASS weight share ex KR by country in OCT
