Import & Export and Air Freight Trends – Korea

❑ Wuhan's new corona virus is showing signs of global supply chain collapse and concerns over paralyzed logistics networks in China's plant shutdown This issue will certainly hurt the global logistics market. However, the effect on the logistics market may differ depending on the timing of virus suppression. In particular, in the case of air cargo, the supply chain collapse has a positive effect in many cases. If the virus is suppressed prematurely, it will be reversed in the short term, but a strong rebound may be expected.[CargoPress]

❑ Top 10 countries 'CASS air cargo export weight by country, and the top 10 countries' exports in China, USA, Vietnam, Hong Kong, Japan and Taipei recorded 46,978 tons, accounting for 75.1% of the total. The ranks change

compared to the same month last year and overall volume declined +2.8%.

Korea Export Aircargo by country in DEC
