“Wrist is sore and tingling” carpal tunnel syndrome

Cause

Inflammation or swelling of muscles or ligaments from repeated use of the wrist causes pressure on the median nerve, which is responsible for part of the motor function of the finger.

Symptom

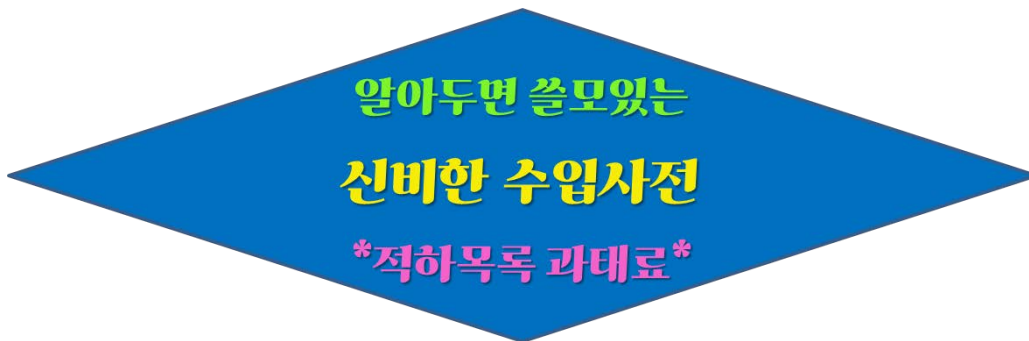

Pain in the palms, fingers, and wrists, numbness, etc. In particular, in severe cases, you may feel a burning pain in the hand, and the thumb muscles may contract and become flat.

It is more common in people who use a lot of computer keyboards or do the job of packing a computer keyboard professionally, and those who repeatedly bend and stretch their wrists, such as bad habits.
