Global and Korean Air Cargo Trends

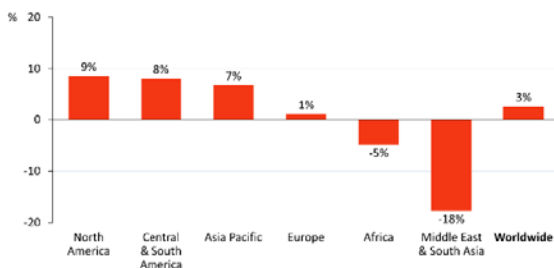

Global air cargo sees “some kind of normality” in April

Global airfreight volumes and capacity were up in April 2021, the latest figures from analyst WorldACD, suggesting — as with March figures — “some kind of normality”.

Global demand in April was up 53% on a year ago, while widebody capacity was up by 51%, reflecting the collapse in bellyhold networks a year ago..

Comparing April 2021 figures with the same period in 2019 to reflect pre-Covid levels, the analyst’s recorded increased demand in: general cargo (61%), live animals (78%) and flowers (67%). For special cargo, vulnerable/high-tech increased by 30%, while pharma declined by 3%.

Year-on-Year change of chargeable weight
Per origin region (Apr 2021 vs. Apr 2019)

Continuing figure comparisons with 2019, airlines based in the Americas gained the most in air cargo exports (8%), a bit more than Asia Pacific (7%) and Europe (1%).

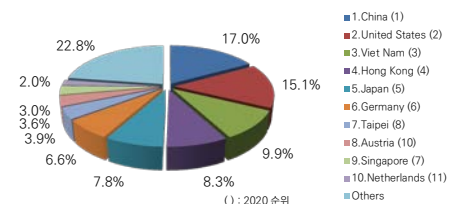

Meanwhile, Africa (-5%) and the Middle East and South Asia (-17%) were “less fortunate”.[Data : WorldACD]

Korean export air cargo market trends

Korea’s export air cargo demand has continued to increase since 2019, increasing by 1.2% in 2020 compared to 2019, and by 14.4% in 2021 compared to 2020, despite the COVID-19 pandemic. On the other hand, a high market price is being formed due to a lack of space supply, but since mid-May, the market price has been falling due to a decrease in cargo demand and a gradual recovery of space supply.

In April, Korea exported the most air cargo to China, followed by the United States, Vietnam, and Hong Kong, and the top 10 countries accounted for 77.2% of the total.

Distinguishing between spring fatigue and food coma and how to prevent it

In these days, when the spring weather continues and the body relaxes and becomes drowsy, unbearable drowsiness appears after lunch. Let's distinguish whether it is spring fatigue because it is spring or food coma caused by eating and find out how to prevent it.

If you continue to feel drowsy after breakfast or lunch, it is highly likely that you have food coma, and if you are often drowsy even after eating, you may have spring fatigue.

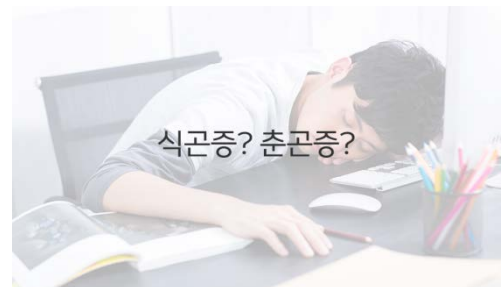

Spring fatigue goes away within 2-3 weeks, but food coma appear in any season.

How to prevent food coma

- ✓ Take a walk after eating
- ✓ Don't overeat

Precautions

- ✓ Live a regular life and get enough sleep
- ✓ Take vitamins and minerals
